Life on a Quail Plantation During Fall and Winter: Preparing for Next Year's Birds

By: *Theron M. Terhune*

The fall and winter months are perhaps the busiest time of year on a quail plantation. Aside from polishing tack, roading or working bird dogs, stocking ammo closets, and of course quail hunting, this is the time to prepare for the future stock of bobwhite. Due to nesting and brood rearing during the spring and

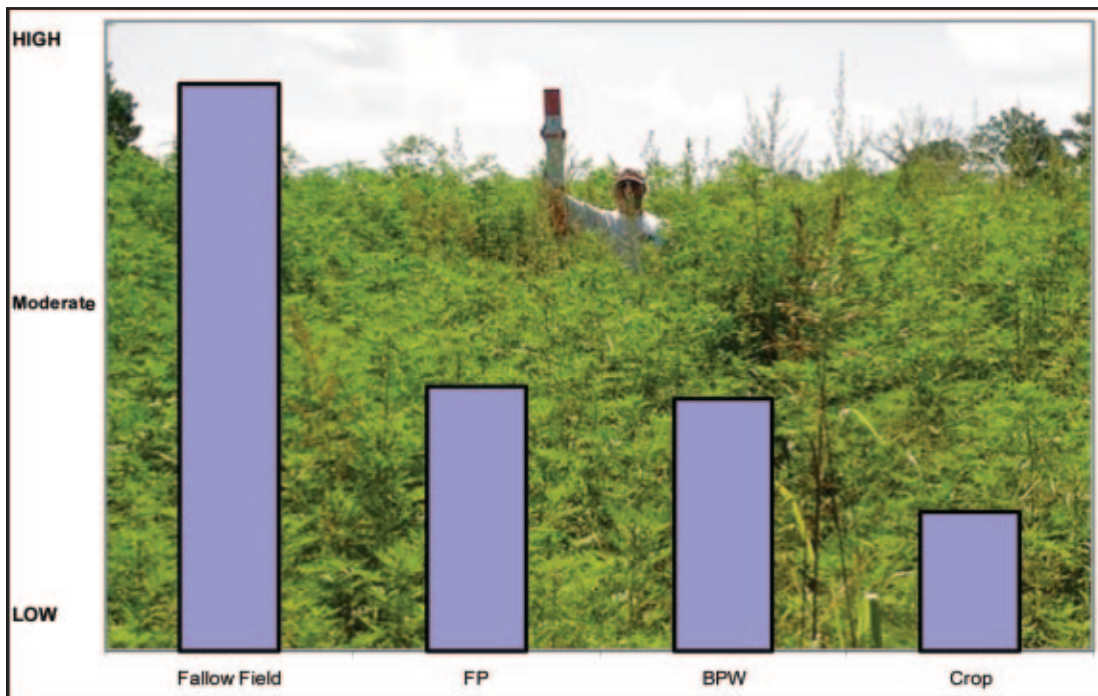

Figure 1: Insect populations rated on low to high scale for Fallow fields, Feed Patches, Burned Piney woods (bpw), and Crops. The background picture is a fallow fertilized ragweed field with an eight foot density board held by a 6'3" field technician.
